

WTN Center for Addiction Treatment and Rehabilitation

Addiction is exile, and recovery is home

Our religion is one of compassion, cooperation, and mutual encouragement in love. We should always be a source of support for others, and society works together to eliminate the scourge of addiction. Undoubtedly, the state cares for its citizens at all levels.

King Salman bin Abdulaziz Al Saud
Custodian of the Two Holy Mosques

Saudi youth are remarkable, aware, and strong. They are ambitious, well-educated and cultured, creative, and possess high values. Youth are among the most important pillars in building the nation.

His Royal Highness Prince

Mohammed bin Salman bin Abdulaziz Al Saud

Our care for youth stems from their importance and, above all, from the attention of His Majesty the Custodian of the Two Holy Mosques King Salman and His Royal Highness the Crown Prince, may God protect them, who have given youth a distinguished status and established committees and institutions to support them properly and beneficially for a prosperous future, for they are the backbone of the nation.

**His Royal Highness Prince Faisal bin Bandar
bin Abdulaziz Al Saud - May God protect him
Governor of Riyadh Region**

Governor of the Riyadh Region

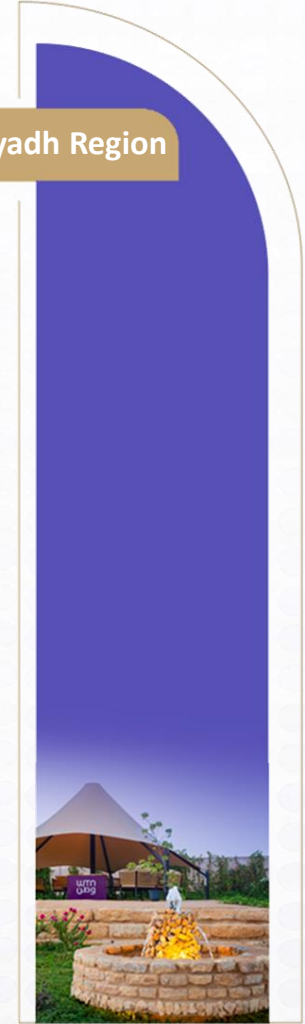

All praise to Allah, by whose grace good deeds are accomplished. Peace and blessings be upon the noblest of prophets and messengers, our Prophet Muhammad, and upon his family and companions altogether. To proceed:

Inspired by an ambitious vision that seeks to enhance quality of life and build a vibrant society that enjoys abundant health and well-being, we at Recovery Home Medical Company are pleased to announce the inauguration of our pioneering landmark: “WTN Center” for the treatment and rehabilitation of addiction.

The location was carefully chosen in the heart of enchanting nature, where the center lies along the banks of Wadi Al-Wasil in the rural Al-Jubaylah area in Riyadh, spanning a vast area of 50,000 square meters.

In this project, we were keen to blend the authenticity of the place with modern architectural design, making the center an architectural icon that provides a calm and therapeutic environment that encourages transformation.

“WTN Center” is not merely a medical facility; rather, it is an integrated system that adopts the latest therapeutic methods and rehabilitation services in accordance with international standards. It aims to be a safe homeland and a refuge for everyone seeking recovery and a renewed passion for life- embodying the highest values of care and empowerment toward a bright, hopeful, and balanced future.

Members of the Board of Directors and Executive Management

Our Objectives

Fourth: To promote social empowerment by moving the beneficiary from institutional treatment to community integration, enabling them to regain their positive role within society.

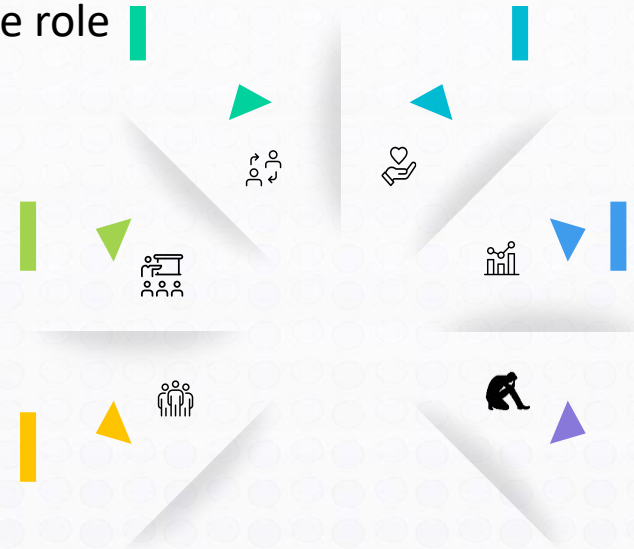

Fifth: To support recovery maintenance programs and self-support systems to ensure sustained recovery through success-oriented pathways, and to create role models in the journey of guided recovery.

Sixth: To adopt the concept of social investment to contribute to addressing the problem of addiction through the establishment of “Athar WTN Charity Company” for the treatment and rehabilitation of addiction.

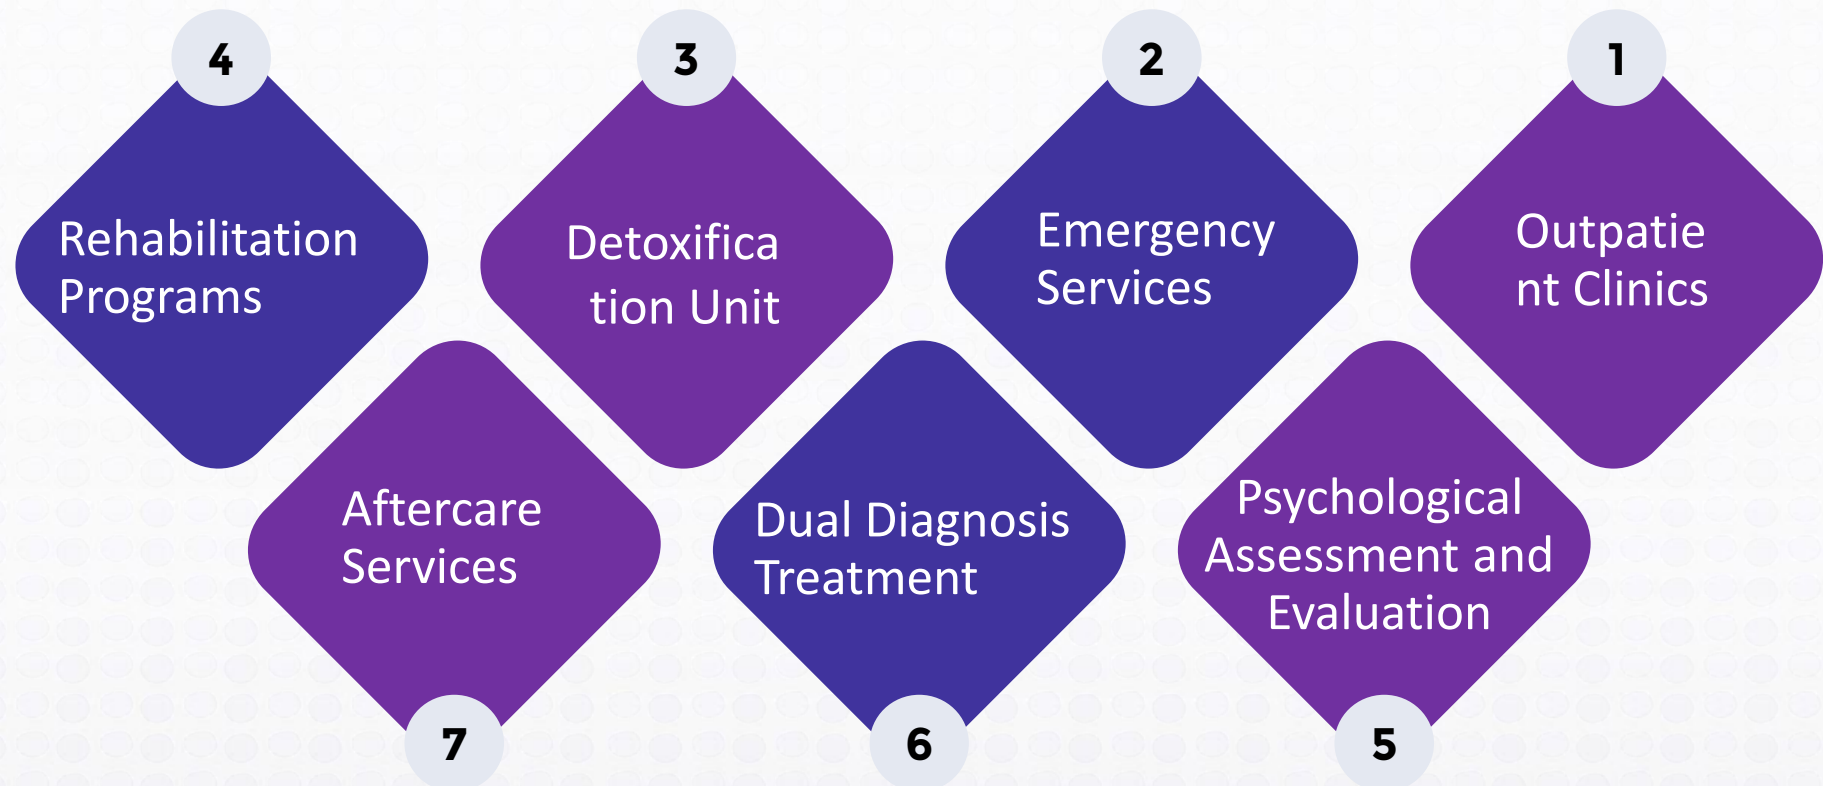

First: To provide treatment services and detoxification through integrated medical care.

Second: To offer rehabilitation services according to scientific programs and practical evidence-based practices across all specialties.

Third: To create an attractive environment that brings together the beauty of place and the concept of human-centered care, aiming to instill values in beneficiaries.

The journey of recovery begins here.
Addiction is exile, and recovery is home

In WTN, we care about the beauty of the place and build the human being.

Every moment in the journey of change represents a step toward a better quality of life and its restoration.

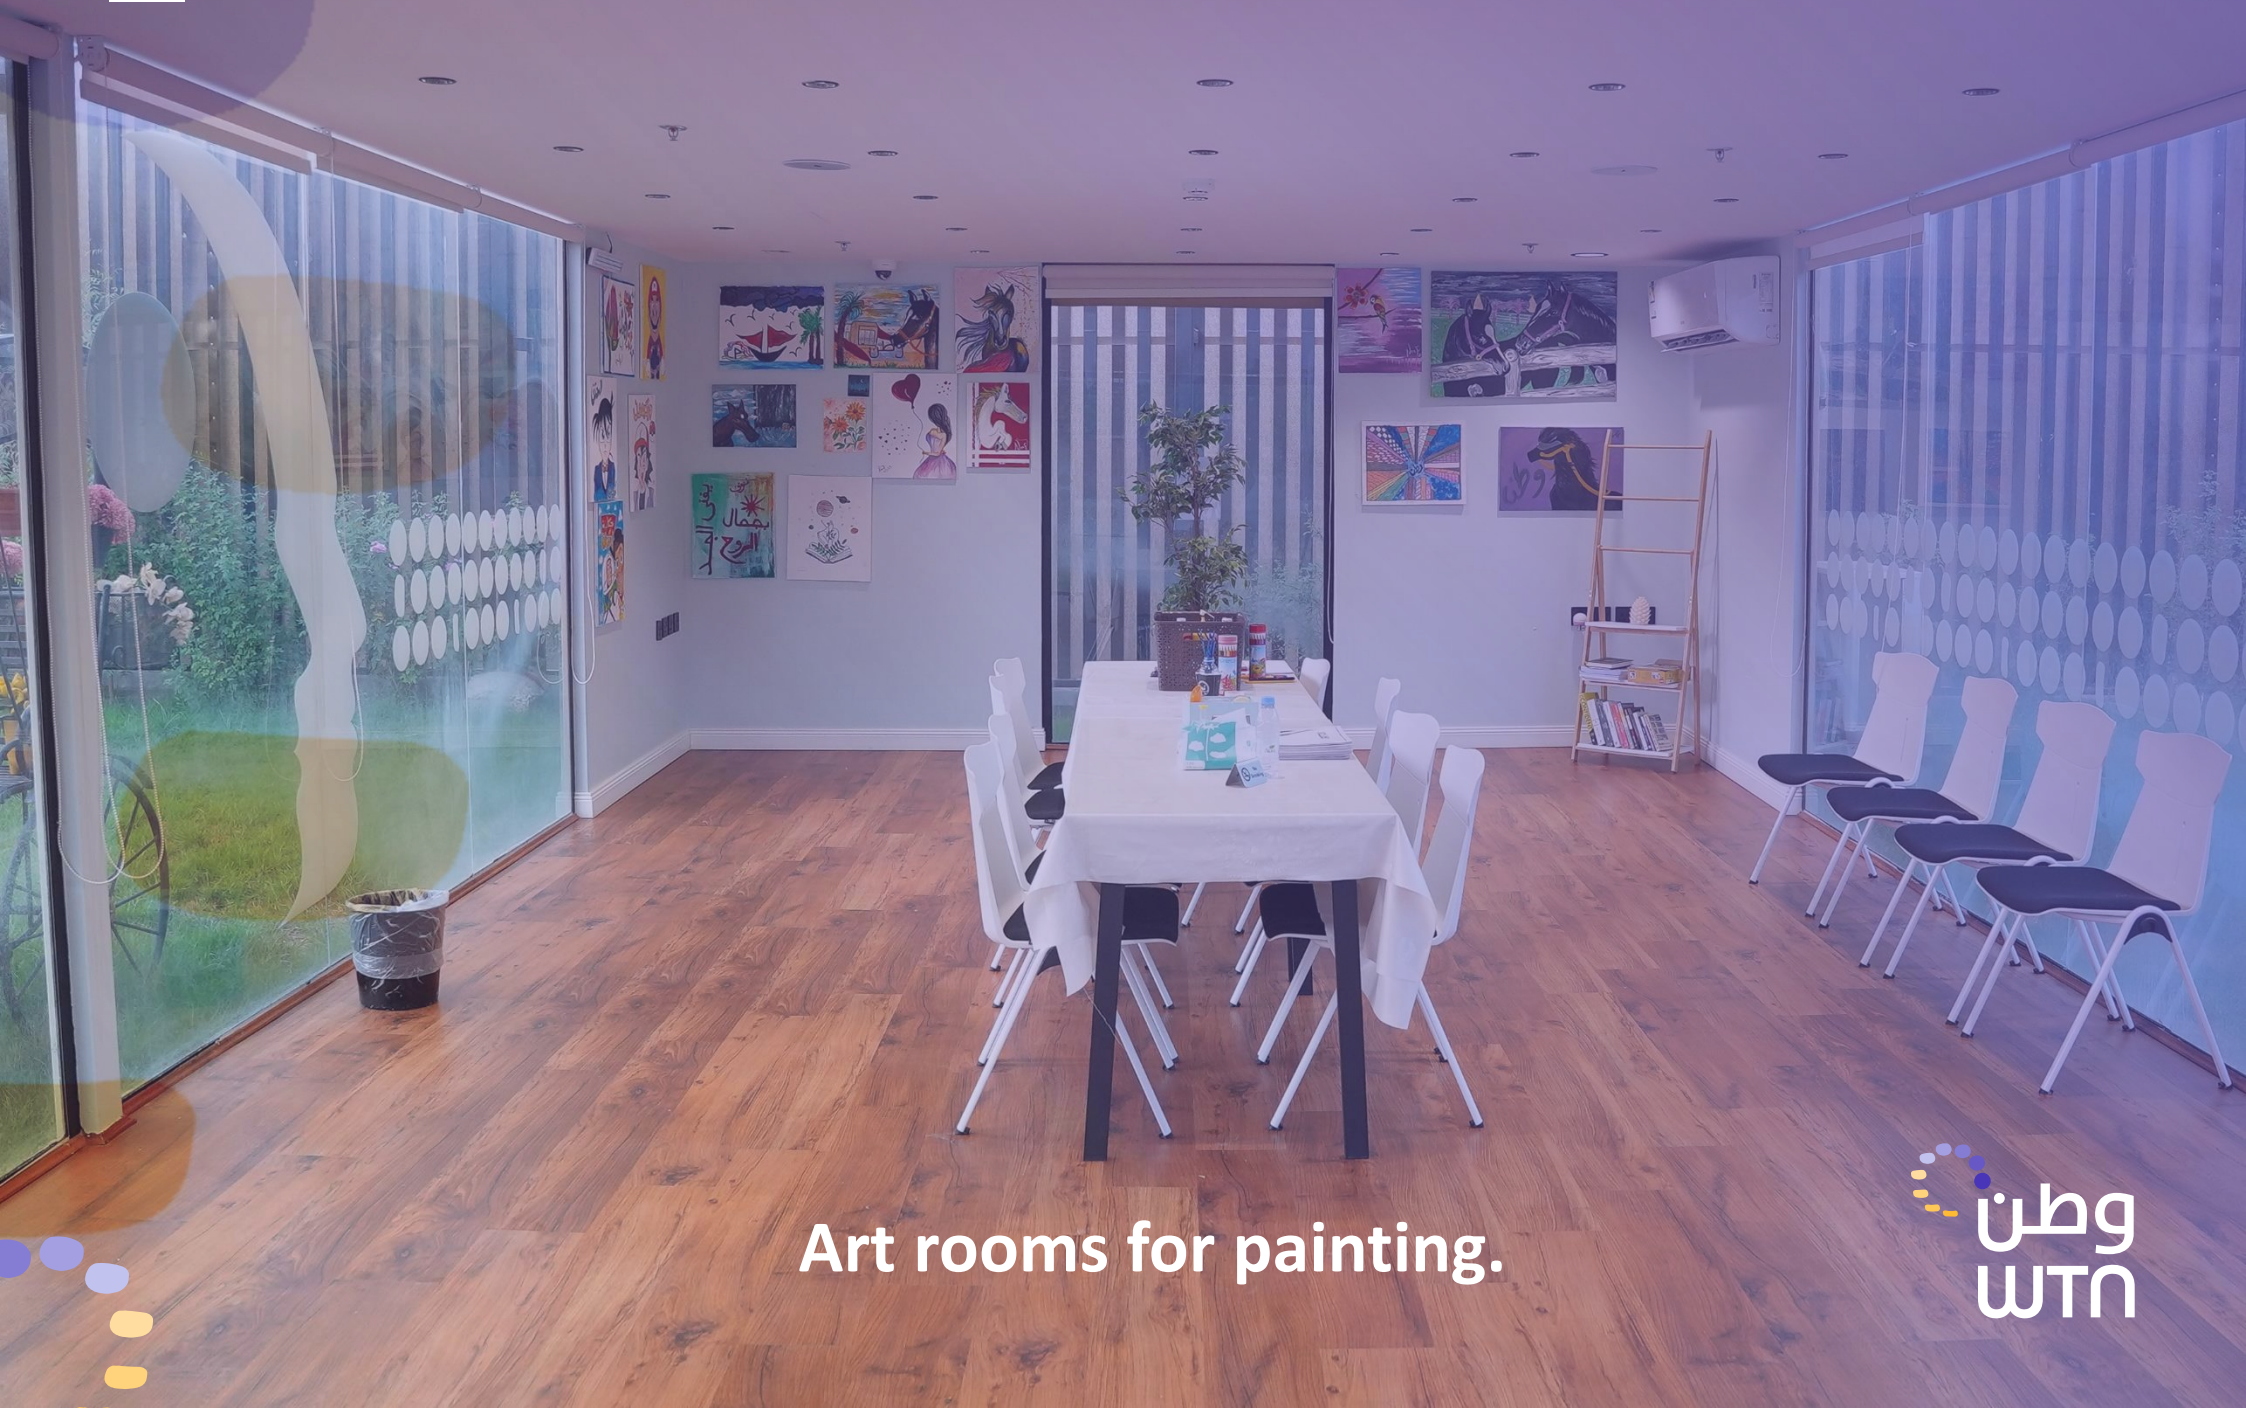

Fully equipped emergency rooms with the latest medical devices.

Individual and group therapy using the latest methods.

Halls for art, cinema, poetry, and creativity.

Art rooms for painting.

Comfortable suites and bedrooms fully equipped
with complete privacy.

Not just a center, but a small homeland
that offers you peace and comfort.

A calm atmosphere, elegant details, and a lasting impression on the memory, along with Starbucks products.

A dedicated women's section with an integrated therapeutic team.

In the Wtn Mosque, the soul heals through its connection with Allah “the Creator”, and the self is freed from the pain of the past to embrace a bright and balanced future.

Various sports halls for physical
rehabilitation that build self-confidence.

Swimming pools designed to promote relaxation.

In Wtn, there is a place for sports.

وطن
WTN

We believe that the family is an essential part
of the success of the treatment process.

Horticultural therapy is not just about growing plants; it is a journey of healing.

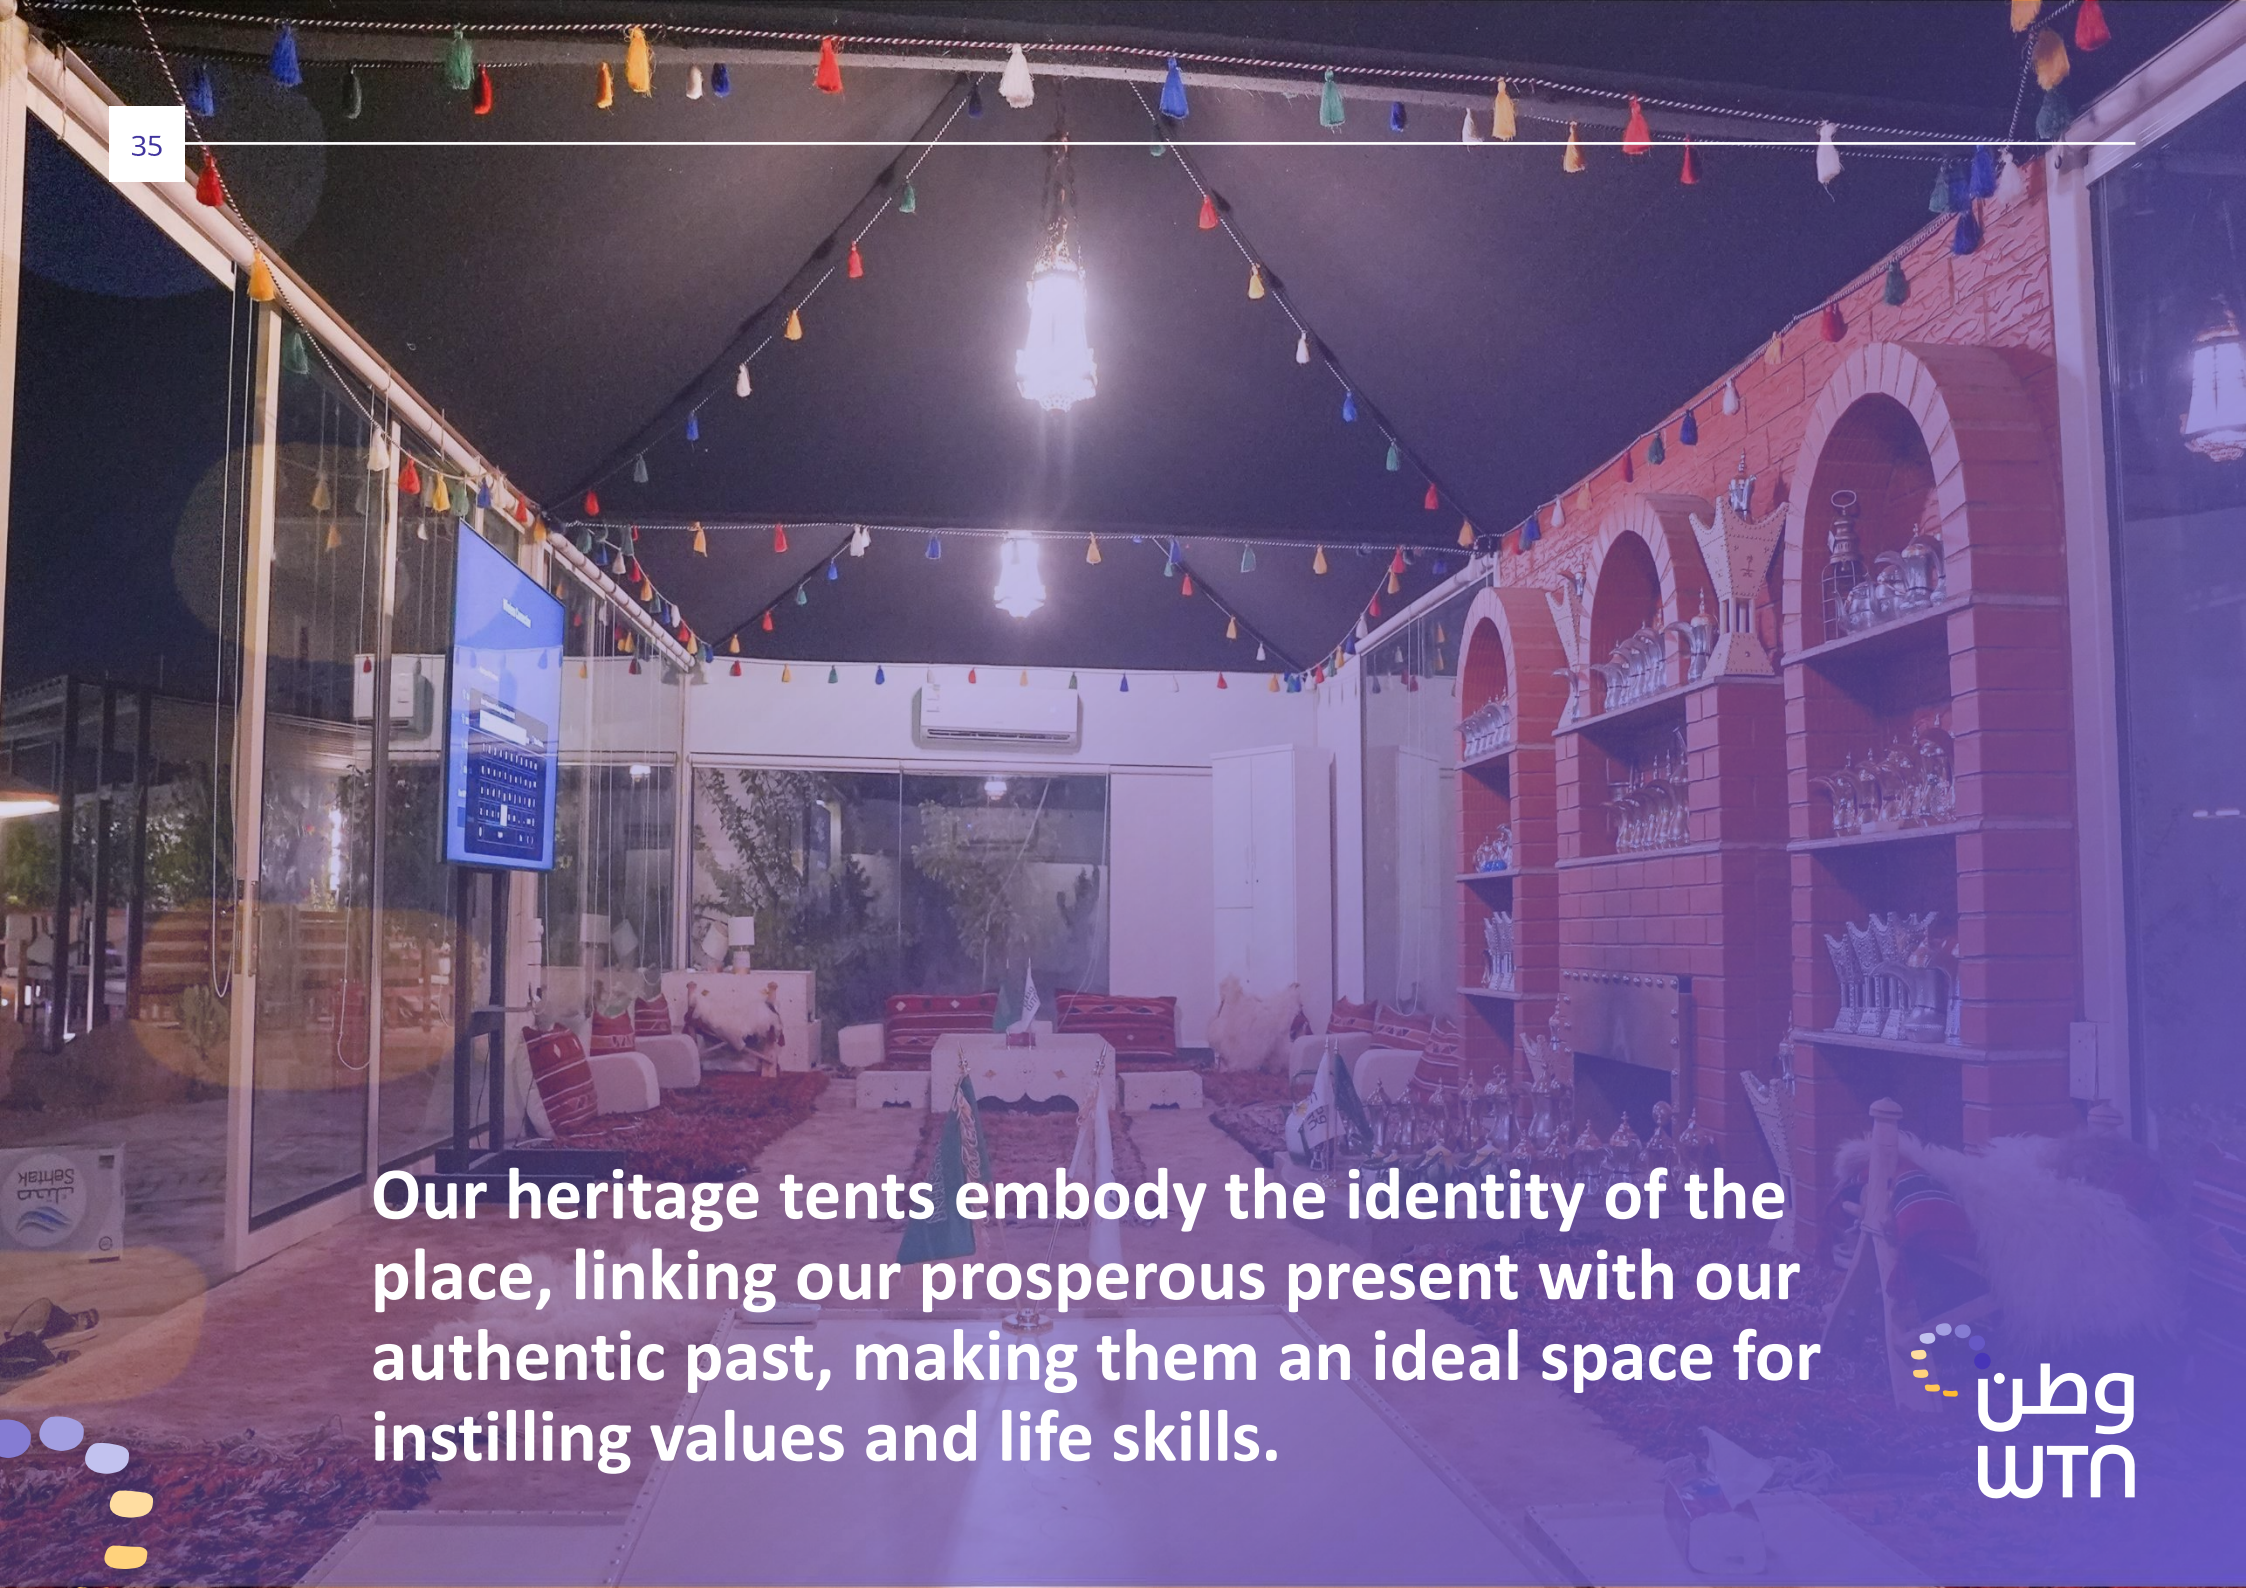

Equine therapy enhances self-confidence and provides a sense of comfort, reassurance, and emotional stability, while also improving communication skills and reducing stress and anxiety.

Together, we build towers of success.

A rural environment and pets.

The image shows the interior of a heritage tent. The ceiling is dark with strings of colorful tassels and a central hanging lantern. The walls are made of red brick with arched niches containing silver teapots. A large screen on the left displays a menu. The floor is covered with a patterned rug, and there are white sofas with red cushions. A small table with a white cloth and a small flag is in the center. The tent is illuminated by warm lights, creating a cozy atmosphere.

Our heritage tents embody the identity of the place, linking our prosperous present with our authentic past, making them an ideal space for instilling values and life skills.
